Grammar in Use

D Listen and sing along. **We Love Animals!**  1:04    

Fish have gills to help them breathe.
They have gills to play in the sea!
Birds have wings to help them fly.
They have wings to play in the sky!
Animals! Animals! We love animals!

How do mammals keep warm?

Do you know?

They have fur to play in the snow!

How do amphibians breathe when
they swim?

Believe it or not, they use their skin!

Animals! Animals! We love animals!

E **Learn Grammar** **Pronouns**

Fish have gills. **They** have gills. Gills help **them** breathe.

Do gills help **fish** breathe? Yes, gills help **them** breathe.

How do gills help **fish**? Gills help **them** breathe.

What animals have these things? Practice with your partner.

Animals

Amphibians

Amphibians are very interesting because they can live on land and in water. Amphibians need to have **wet skin**, so they live in wet places. They lay their soft eggs in water. They have gills when they're young and the gills help them breathe in water. Most amphibians, like frogs, have legs that help them walk and jump on land.

Think How are amphibians the same as fish?

Mammals

Think How are mammals different from amphibians?

Some **mammals** live on land and some live in water. Whales are water mammals, and cats, rabbits, and lions are land mammals. Hair or **fur** covers most land mammals' bodies and this helps keep them warm. People are mammals too! Mammals don't lay eggs. Their babies drink milk from their mothers.

Words

A Listen and point to the words. Listen again and say the words.  1-02

skin

mammals

eggs

amphibians

scales

gills

feathers

wings

fur

B Read the sentences. Write the words from **A**.
